## M. C. Johnson Company Debuts Pediatric Device

M. C. Johnson Company, who pioneered the industry in multi-purpose tube holders announced the launch of their new Foley catheter securement device, CATH-SECURE *for Kids*™. The company has specialized in securement devices for the medical industry since 1981. Developers of the CATH-SECURE, M. C. Johnson has offered their solutions to facilities worldwide to properly secure medical tubes. M. C. Johnson President Matthew LeLievre said, "I have been asked so often if we had a product like this in our line, we just felt the market was demanding CATH-SECURE *for Kids*™ and we are particularly looking forward to working with a niche market to improve the quality of their patients' lives."

Over the past few years M. C. Johnson Co. has heavily invested itself in R&D which has helped to expand their product line. The CATH-SECURE *for Kids*™ is just the start of many new products to come from the pioneers of the securement device industry.

A quality product backed by superior customer support and education has carried M. C. Johnson Co. to new heights in their industry.
